

Your Automation Partner

Story: *a story in growth*

- Established in **1980**, the brand gives information about its electromechanical DNA, one milestone in a consolidated Know-how in hardware-software industrial automation projects.
- **1988-1989** With new plant, built in Asti, ELETTROSYSTEM orientates business in assembly automatic solution.
- **1990-1994** ELETTROSYSTEM integrated mechanical design in its project team, with complete design turnkey solutions in handling, assembling and testing applications.
- **1997-2003** ELETTROSYSTEM inaugurates new plant to complete growing in full service supply to customers, from preliminary design, design, manufacturing, start-up, installation and service/after sales service.
- **2012-2013** Internationalization: ELETTROSYSTEM started a new policy for international growth with the direct presence in Europe, Asia and South America markets and new technical and commercial office in Germany, heart of European market and Lean Production approach
- **2015-2016** Standardization

Location: Italy

ELETTROSYSTEM plant is located in the middle of Piedmont hills, heart of typical Ruchè red vineyards.

Plant Numbers:

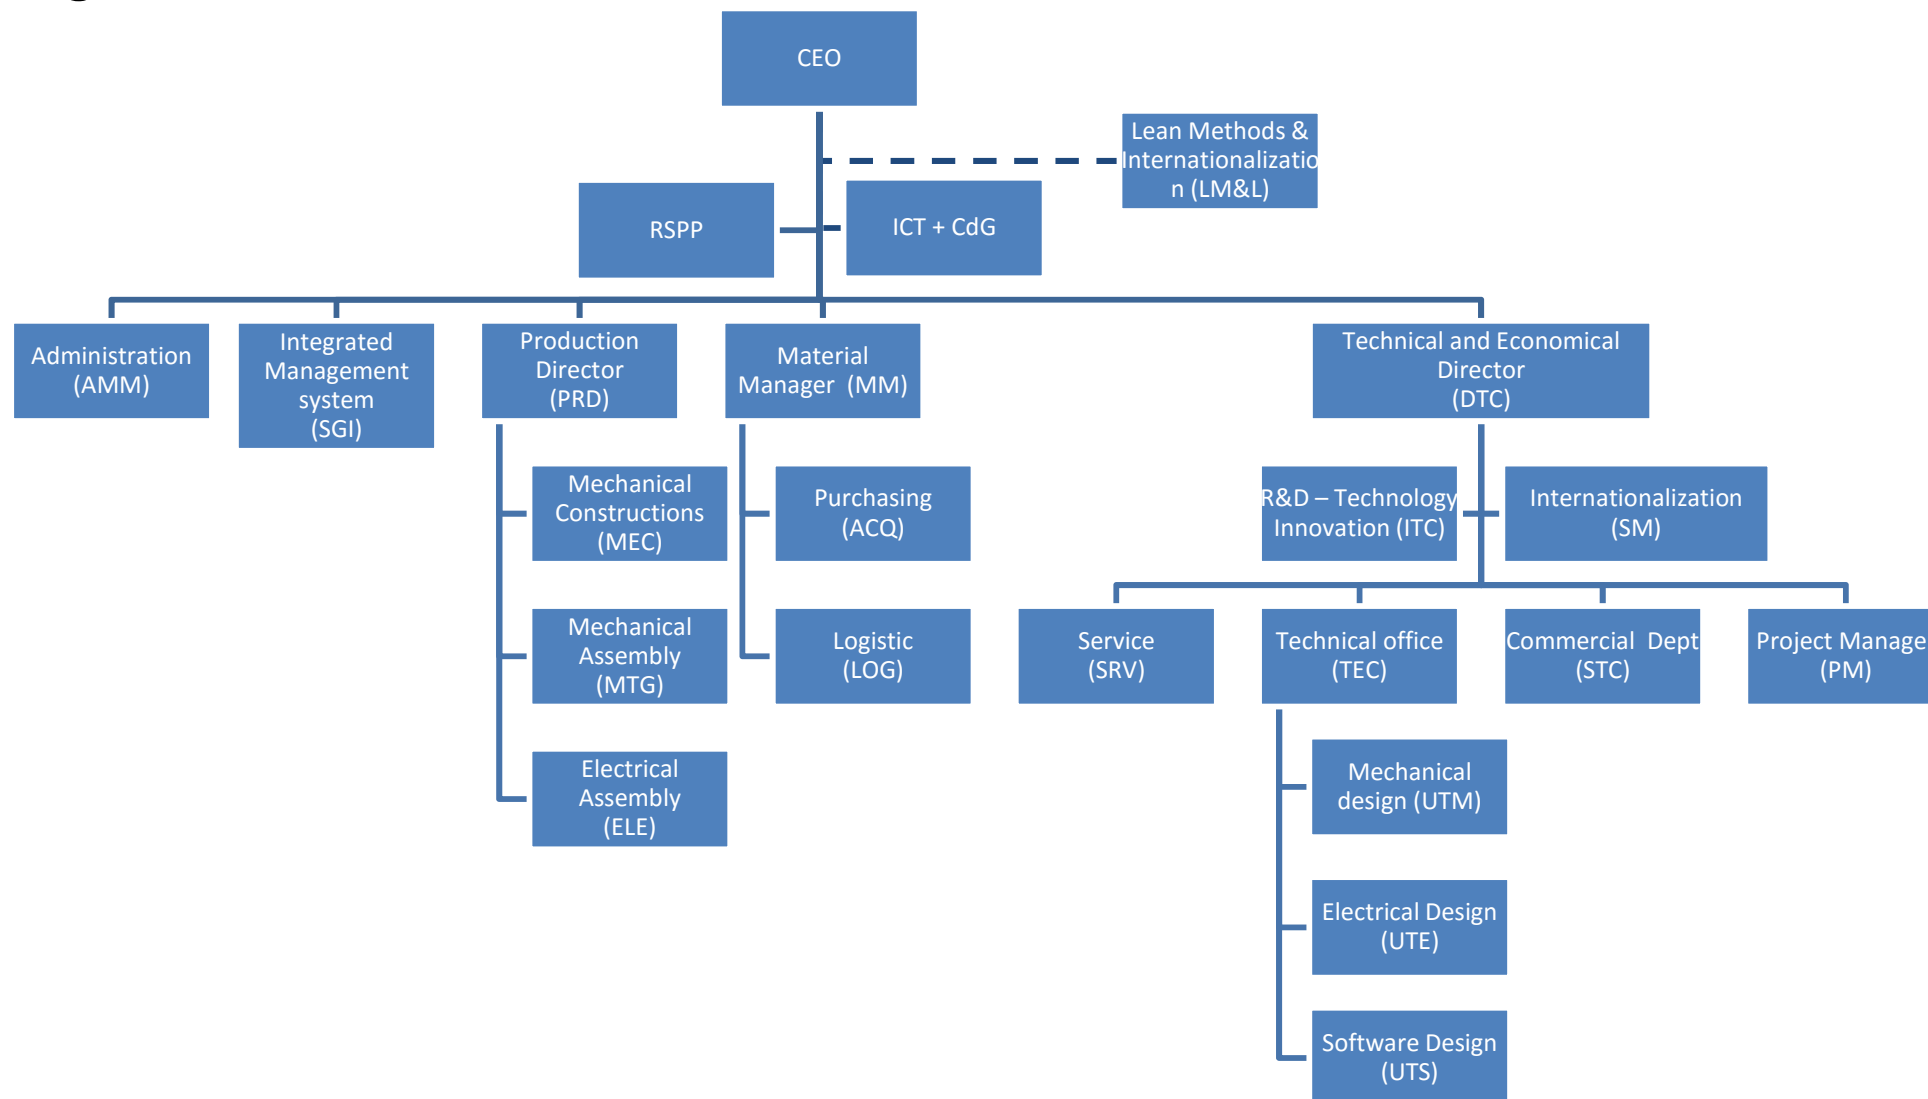

- 10.000 m² global area
- 4.800 m² workshops area
- 1.200 m² Offices area
- Zero Emission plant, totally powered by renewable Energy

Location: Germany

ELETTROSYSTEM offices in Mercedes Strasse, Stuttgart.

Organization chart:

Mission: *Customer and innovation oriented*

ELETTROSYSTEM proposes itself as a strategic partner for its customers with design and building of high technology solutions in assembly and testing process machines to make the difference and gives competitive advantages and profitability in international markets.

With over 30 years of consolidated know how, ELETTROSYSTEM gives a flexible and advanced supply to its customers, basing solutions on experience gained in collaboration with most important industrial groups in Europe and continuous improvements by internal R&D department.

MILESTONE 1

Give a professional supply from first approach at customer request, to after sales service with high technicians skill levels.

Quality: Our Must

To maintain and guarantee compliance with quality standards ,
ELETTROSYSTEM has put in place a Quality Management System, which is
certified in compliance with the UNI ISO 9001 standard and confirmed in 2013.

MILESTONE 2

Quality is considered a strategic and
important aspect in supply to
customers request.

Service:

Elettrosystem consider service and After sales a strategic division, in terms of customer satisfaction and reliability of machines in life time.

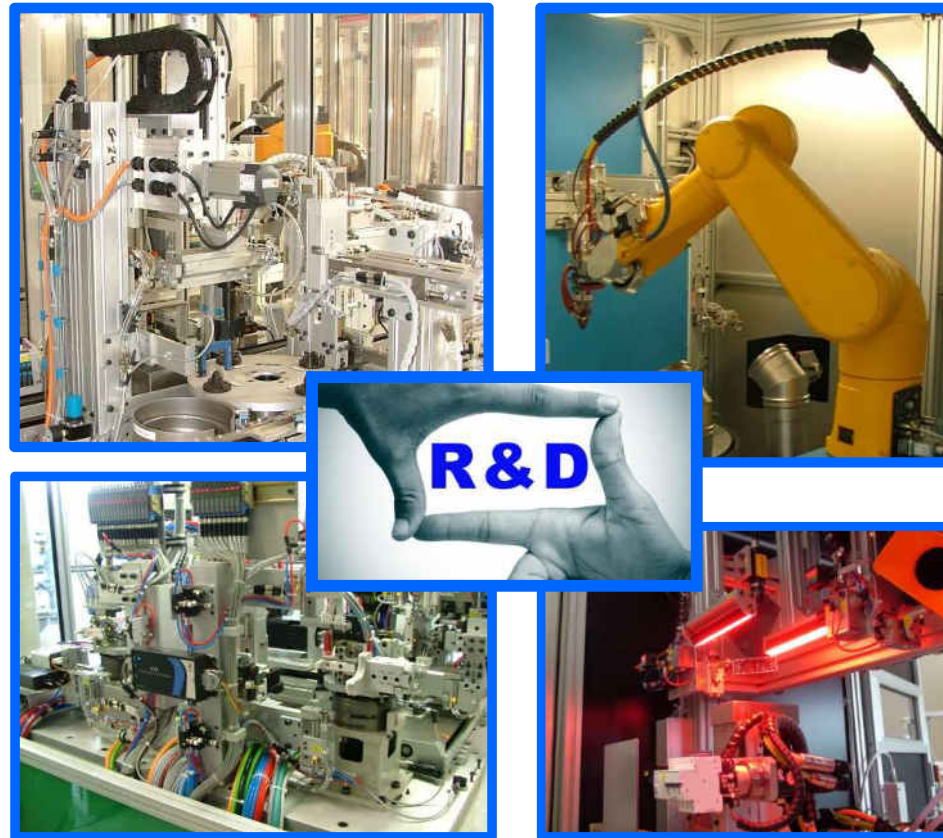

With a dedicated qualified technical staff, Elettrosystem supports its customers during machine life time in ordinary and extraordinary maintenance service, by remote or on-site assistance.

MILESTONE 3

Best and fast support with problem solving and reliability of machines during life time, gives competitive advantages to Elettrosystem and its customers

R&D: *Continuous improving*

ELETTROSYSTEM invests every year, resources in research and development to increase know-how and propose advanced solutions to customers requests.

Project Team:

“Life” of project is managed by a dedicated team to put together different skills:

1. **Project Manager:** Global responsible.
2. **Proposal Engineer:** Develop technical and economical solution to customer.
3. **Technical Leader:** Responsible to guarantee correct execution and engineering of product.
4. **Industrial Operation leader:** Controller of purchase, logistic and manufacturing
5. **Site Manager:** Responsible for the operation on-site.
6. **Project Controller:** Check and monitoring of economical evolution of the project.
